## Linked protocols

This buffer is used in:

- <List relevant protocol IDs, e.g. LIV-001, SPN-001, etc.>

## Composition

<Describe the buffer composition, either per X mL or as % concentrations.>

Example structure:

Component	Stock concentration	Volume for final	Final concentration	Notes
-----------	---------------------	------------------	---------------------	-------

### Note

Add optional notes about working vs stock versions.

## Preparation

### A. Preparation of stock (if applicable)

<List clear, step-by-step instructions.>

### B. Preparation of final working buffer

<List final steps, adjustments, pre-warming notes, etc.>

## Storage and stability

- Describe storage of stock versions
- Describe storage of working solutions
- Provide any stability windows (e.g. “Use within 6 months”)
- Optional: note how thawing or aliquoting should be done

### Note

Include any exceptions or internal validations here.

## Reagent details

Fill this table with supplier + catalogue info when known:
